Dear Ms. Roverud,

On behalf of the United Auburn Indian Community, thank you for the notifications for the Sugar Pine Village Affordable Housing Project. Please update your contact information for UAIC to the following:

Matthew Moore – Tribal Historic Preservation Officer (no longer Jason Camp);
Anna Starkey – Cultural Regulatory Specialist (Marcos is no longer with UAIC).

I checked the addresses you provided in our database and no known tribal cultural resource are present. If any are discovered during ground disturbing activities, we ask to be immediately notified so we may identify, evaluate, and recommend treatment for the resource (see attached mitigation measure). However, UAIC generally defers to the Washoe Tribe for projects in the Lake Tahoe area. If a resource is discovered and the Washoe are not able to get ahold of, then please contact UAIC.

Thank you for your time and consideration.

Best,
Anna

Tribal Cultural Resources Unanticipated Discoveries

The following mitigation measure¹ is intended to address the evaluation and treatment of inadvertent/unanticipated discoveries of potential tribal cultural resources (TCRs), archaeological, or cultural resources during a project's ground disturbing activities.

If any suspected TCRs are discovered during ground disturbing construction activities, all work shall cease within 100 feet of the find, or an agreed upon distance based on the project area and nature of the find. A Tribal Representative from a California Native American tribe that is traditionally and culturally affiliated with a geographic area shall be immediately notified and shall determine if the find is a TCR (PRC §21074). The Tribal Representative will make recommendations for further evaluation and treatment as necessary.

Preservation in place is the preferred alternative under CEQA and UAIC protocols, and every effort must be made to preserve the resources in place, including through project redesign. Culturally appropriate treatment may be, but is not limited to, processing materials for reburial, minimizing handling of cultural objects, leaving objects in place within the landscape, returning objects to a location within the project area where they will not be subject to future impacts. The Tribe does not consider curation of TCR's to be appropriate or respectful and request that materials not be permanently curated, unless approved by the Tribe.

The contractor shall implement any measures deemed by the CEQA lead agency to be necessary and feasible to preserve in place, avoid, or minimize impacts to the resource, including, but not limited to, facilitating the appropriate tribal treatment of the find, as necessary. Treatment that preserves or restores the cultural character and integrity of a Tribal Cultural Resource may include Tribal Monitoring, culturally appropriate recovery of cultural objects, and reburial of cultural objects or cultural soil.

Work at the discovery location cannot resume until all necessary investigation and evaluation of the discovery under the requirements of the CEQA, including AB 52, has been satisfied.

¹ Proposed Mitigation Measure includes suggested template language to assist lead CEQA agencies, and their consultants, in understanding the Tribe's policies and expectations. All measures are subject to periodic review and change by the consulting Tribe to reflect best practices and to be worded on a project scope and site specific basis.
